DETAILED ACTION

Election/Restriction

1. Applicant's election without traverse of Species I in Paper No. 4 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 19-21, 23 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gedney et al (US 5,483,421).

Gedney discloses fabricating an interposer with organic material; populating the second surface with a plurality of conductive pads; coupling solder balls; coupling at least one die; coupling the interposer to a substrate; electrically connecting the selected ones of the pads (Fig. 5).

Gedney fails to disclose coupling at least one passive device and testing the interposer.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to couple the interposer with at least one passive device as well as testing the interposer in order to lower production costs and regulating the voltage and current to the assembled package.
